

Create a Web Site - Google Sites Assignment

About Google Sites

There are many ways to create your own web page. Google Sites is an easy way to create a simple web site.

Before you Begin

- Resource for creating a Google Site: <https://support.google.com/sites#topic=6372850>
- You should use the new “new” Google Sites, not the “classic” Google Sites. To get to the new Google sites, go to <https://sites.google.com/new>. When you begin to create an actual site using the new Google Sites interface, you will see the "Publish" button at the top right.
- Be sure you are using Google Chrome
- Sign in at Google with your Google account

Your Assignment

1. You are to use Google Sites to create a website for your hypothetical business. The website should consist of at least three web pages, as follows:
 - The home page. The home page should have your company name. Your logo should be inserted on the page. Make sure you designate it as the home page. Add other things you think would be appropriate for your business web page.
 - **About Us** page: Use this web page to give information about your company, such as how to contact you, times your business is open, etc.
 - **Products** or **Services** page; Use the page to describe the services or products your business offers.
2. Publish your page, but do not allow your site to appear in Google search results
3. Add me as an editor to your page (use this email: cammackje@gmail.com)

Submit Your Assignment

- In Blackboard, include a clickable the link to your webpage. It will be something like:
<https://sites.google.com/view/nameofyoursite>
