

Google Apps Assignment - Team Survey (Part 1) - Survey Creation

Assignment: You are to work with the others on your team and develop a team survey using Google Forms. The survey should relate to the topic of your Technology Video Project. This week, your team will create the survey and submit it to me in Blackboard. Next week, you will distribute the survey to the class and analyze the results.

Example: Suppose your team's topic is The World Of Apple. Your team might have a Google Hangouts video chat, a group text message, or an email conversation where you all discuss and input ideas for the types of questions you'd like to have. Then, let's say the team decides the survey should focus on Apple apps that people might use. So, the team decides to create a survey to find out info about Apple apps people are using. For example, which Apple apps they use, how often they use the apps, where they use the apps (phone, tablet, desktop, etc), for what purpose (leisure, work, etc) etc. etc. So, one team member then creates the survey in the team's folder and each of the other team members add suitable questions.

Dates for completion:

- Monday 4/11/16 (end of the day) - decide on the survey topic and one team member creates the initial survey in the Team x Video Technology Project folder.
- Wednesday 4/13/16 (end of the day) - all survey items created.
- Thursday 4/14/16 (end of the day) Team members all have submitted required items in Blackboard.

Notes:

1. Create the form in the shared team folder you created for the Getting Your Team Organized assignment. It is the folder named Team x Video Technology Project (where x is your team number). If you create the form in that folder (and if the folder has been shared properly) then all the team members will be able to access and edit the survey.
2. Each team member should create at least one item on the survey. Include your initials at the end of the item(s) you create.
3. The survey should have no more than 10 items.
4. Create at least one question on the survey which requires a numeric response and data validation.

Submitting the assignment:

In Blackboard, for **Google Apps Assignment - Team Survey (Part 1) - Survey Creation**, submit the following items:

- a. Provide a link to your Team x Video Technology Project folder. This folder should have previously been created in your Google Course folder so I will be able to open and edit you form. Make this a clickable link in Blackboard,
- b. Provide the link for me to complete the survey. This should also be a clickable link which opens in a new window.

Next week, you will distribute the survey to the rest of the class and analyze the responses.
