

Screen Capture (Screenshots)

Jim Cammack

Throughout this course, you will need to take screenshots of your computer's screen. To do this, you can use the **Snipping Tool** or the **Snip & Sketch** program. To view a demonstration of how to use the **Snipping Tool**, click this link >> [Snipping Tool Demo](#)
In the latest versions of Windows, a program called **Snip & Sketch** is replacing **Snipping Tool**. If you prefer, you may use it instead of the **Snipping Tool**, if you prefer. To view a demonstration of Snip & Sketch, click this link >> [Snip & Sketch Demo](#) For exams, you will need to be able to use the **Snipping Tool** or **Snip & Sketch**.

A Note for Mac Users: the **Snipping Tool** is not available for the Macintosh computer. If you have a Mac, take a look at this video to learn how to take screenshots. <https://www.youtube.com/watch?v=oeuw08pEBqw&feature=youtu.be> Remember for exams, you will need to be able to use the **Snipping Tool** or **Snip & Sketch**.
